REQUEST FOR REFUND

Sir:

Applicants request a refund in the above-identified application due to an error on the part of the Patent Office. On November 22, 2004, Applicants filed an Information Disclosure Statement. The Information Disclosure Statement was filed within three months of the discovery date. A copy of the Foreign Patent Office communication of October 21, 2004 citing the reference cited in the IDS is enclosed as evidence that the IDS was filed within the three-month certification period.

Appl. No. 09/939,591
Request for Refund dated January 7, 2005

However, the Applicants' representative's Monthly Statement of Account for December 2004 (copy enclosed) indicates that an Information Disclosure Statement fee was charged to the deposit account on December 15, 2004, even though there should have been no charges for the Information Disclosure Statement filed.

Please credit a refund in the amount of \$180.00 to the Deposit Account No. 50-1417.

Communication pursuant to Article 96(2) EPC

The examination of the above-identified application has revealed that it does not meet the requirements of the European Patent Convention for the reasons enclosed herewith. If the deficiencies indicated are not rectified the application may be refused pursuant to Article 97(1) EPC.

You are invited to file your observations and insofar as the deficiencies are such as to be rectifiable, to correct the indicated deficiencies within a period

of 4 months

from the notification of this communication, this period being computed in accordance with Rules 78(2) and 83(2) and (4) EPC.

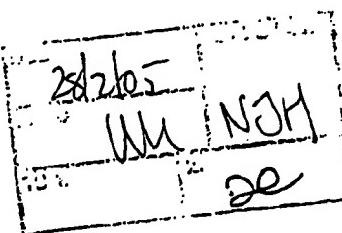

One set of amendments to the description, claims and drawings is to be filed within the said period on separate sheets (Rule 36(1) EPC).

Failure to comply with this invitation in due time will result in the application being deemed to be withdrawn (Article 96(3) EPC).

1). Amendments, Art.123

These are based upon content of the the originally filed description, claims and drawings of the application. There is no objection under Art.123(2).

2). Novelty, Art.54(2)

The process of claim 1 is not considered novel with respect to the following document, which is cited in addition to those in the search report.

D5, US5651842, discloses a method of manufacturing a corrosion resistant and wear resistant alloy which is hot forged after casting to break up the cast dendritic structure and evenly distribute eutectic carbides. The method of claim 1 is not novel.

3). Inventive step, Art.56

The process of claim 1 is, in essence, a method of hot working Fe, Ni and/or Co based alloys after casting into slab at a temperature below the solidus temperature. Such a method is not only trivial in the art for these alloys, methods of hot working slabs of these alloy types are well known and have been practised for decades to break up the as-cast dendritic microstructure. Such a microstructure comprises interdendritic carbides, and these have in the past always been broken up and evenly redistributed in the microstructure by hot

working. Such a redistribution of primary and eutectic carbides in the microstructure was, very early on, found to have beneficial effects for all manner of alloy properties, including the physical properties such as hardness, tensile strength and corrosion resistance, the latter due to the absence of corrosion by galvanic cell corrosion caused by large unevenly distributed second phases, such as carbides and by chromium depletion during cooling/solidification into the as-cast structure.

The features in the dependent claims would appear neither novel nor inventive.

4) Remarks

The present set of claims is not allowable. The applicant should expect a refusal of the application.
